

Regional Environmental Control Systems Service

Information Leaflet

Shining a light on the future

Introduction

This leaflet provides you with information about the Regional Environmental Control Systems Service. If you are not sure about anything in this leaflet please ask a member of staff.

What is the Regional Environmental Control Systems Service?

The Regional Environmental Control Systems Service assists people with physical disabilities to operate a wide range of equipment and/or appliances within their desired environment.

Main uses of Environmental Control Systems are for:

- Security – alarms, door locks, intercoms
- Communication – telephones
- Comfort – lights, heaters
- Entertainment – television, video, hi-fi, DVD
- Home control – doors, windows
- Computer access

Who is it for?

The service is for people of all ages who have a limiting physical disability. Equipment can be controlled using various methods i.e.

- Switches – these can be operated using any controllable body movement
- Voice recognition
- Direct access – special keypads

Equipment provision can help you to alleviate or compensate for an injury or impairment, and can help you to maintain or increase your independence.

What do we offer?

- Visiting Assessment Service: this takes place in the most appropriate location (usually your home address)
- Equipment provision
- On-going service and maintenance
- Review and re-assessment (if required)

What happens when I attend my first appointment?

Your first appointment will take place in the most appropriate location, usually your home. You will be visited by an Assessor, usually accompanied by local therapy staff. The Assessor will look at your physical capabilities, your medical condition, any family/carer involvement, your home environment and your aims and expectations.

During the assessment you will be given the opportunity to try different pieces of equipment.

What happens next?

You and your referrer will be provided with a written report following your assessment. The recommendations will usually be discussed with you on the day of your assessment. If an equipment installation is required, then further involvement may be required with your local therapist, social services and the assessment team to clarify your needs. Once this has happened the equipment will be installed and you will be given the appropriate training. You will be reviewed after a couple of months.

The equipment will be serviced and maintained by the team and you will automatically be reviewed on an annual basis. Any problems can be flagged up immediately.

How do I access the service?

You can refer yourself or be referred by a family member, your doctor, a therapist or other agencies. The Regional Environmental Control Systems Service can be contacted by telephone, email, or in writing.

Travel information

Contact Nexus Traveline Tel: 0871 200 22 33 Website: www.traveline.info/

Useful contacts

- Northumberland, Tyne and Wear NHS Foundation Trust
Tel: 0191 213 0151
